

Maths is a subject which will no longer be moderated through the primary phase. This may sound great...but there is an awfully long time between statutory assessments in Reception and Year 6 to inform us of pupil outcomes.

Are your teachers sufficiently aware of what age-related, mastery outcomes, greater depth, working towards and SEND outcomes truly look like?

Our highly skilled Maths Adviser, and experienced moderator on behalf of Birmingham LA, will share her expertise to enable you to both moderate pupils working across all year groups, and skill up your staff to make accurate judgements. We will look at this in both dynamically, oral AfL situations, and when marking written work which will lead to summative assessment also. Accurate assessment of outcomes will enable teachers to close the gap between Pupil Premium learners, offer accurate transition data, and consider both ends of the attainment scale in order to future plan accurately with the correct starting points for all learners.

This half day, online course will consider resources which give opportunities to make true and accurate judgements across the primary phase in Maths. This course is best suited to Maths Leads, Assessment Leads and Phase Leads who wish to ensure that quality of education and leadership and management aspects of the EIF are satisfied. It will assist in moderating maths standards across your school and enabling your teachers to share the same vision.

About the Adviser

Helen Grundy - Adviser, Services For Education

Helen's journey began in 1998 when she proudly graduated with a first-class honour's degree in English and Education Studies. Her time studying in Amsterdam at the Hogeschool Holland added a TESOL element to her degree, opening her eyes to international approaches to education.

Her teaching career in Staffordshire saw her excel in various roles, from subject leadership to SENCo and SLT. Helen's passion and dedication led her to become a Leading Maths Teacher, supporting colleagues and ultimately transitioning into consultancy and advisory roles.

Joining Services For Education in 2015 as an Education Adviser, Helen's initial focus on Maths Advising quickly expanded to include managing the highly successful Health for Life in Primary Schools programme and overseeing ECT Induction. Her expertise is also sought after for delivering parts of the nationally recognised NPQ suite of qualifications.

Helen's journey is not just a career, but a testament to her unwavering commitment to education and the betterment of schools and students.
